Ethics and Confidentiality

All University of Illinois System employees must follow ethical practice and maintain confidentiality when dealing with contracts. Contracts stored in the Illinois Contract System (iCS) repository are official documents of the Board of Trustees.

With the advent of your new on-line accessibility, you will have access to electronic copies of university contracts and other contract information that historically has not been available. Please keep in mind, this access does not grant anyone within the unit the authority to email or distribute contract documents or information contained within those documents.

If a user receives a request from an outside entity for information contained within a contract, it is important to understand that often the university may need to redact certain information prior to disclosure (i.e. intellectual property or any information causing competitive harm). In general, requests by third parties for contracts should be immediately forwarded to the Office for University Relations to be processed as a Freedom of Information Act (FOIA) request. The contact information for the Office for University Relations is as follows:

Thomas Hardy  
University Relations  
506 S. Wright Street  
Urbana, IL 61801  
Email: foia@uillinois.edu  
Fax: 217-333-6400

Email is the fastest and preferred method to forward a request to the Office for University Relations. Upon receipt of the contract request, University Relations staff may contact you to discuss the request and any contacts responsive thereto.

Please keep in mind that all employees must follow the University Code of Conduct and its confidentiality requirements. For more information please visit http://www.ethics.uillinois.edu/cms/one.aspx?portal1d=1109782&pageld=1114598
Section 1: Getting Started

Logging in
2. Enter your University of Illinois System NetID and password and click the Log In button.
3. After login, the system launches and displays the Document view and your Personal tab.
Section 2: System Navigation

2.1: Main Page Layout

1. System Links
   - Help
   - Preferences
   - Logout

2. Tab Row
   - **Personal**: New documents created from templates and some imported documents are stored in the Personal Cabinet.
   - **Cabinets**: Repository of all contracts and other documents. Users can navigate through the folder hierarchy to access a contract or related document. Not all Cabinets are public. Your view of available cabinets and the documents stored within depends on your level of permission.
   - **Templates**: Displays a library of standard templates that can be used to create contracts.
   - **Clauses**: Displays a list of standard legal and business clauses which can be included in templates and other contract documents. Normally, clauses are a few standard paragraphs, but can be of unlimited length and complexity.
   - **Recent**: Recently accessed documents.
   - **Subscriptions**: Documents changed by others to which you have subscribed.
   - **Favorites**: Your bookmarked documents for quick access.
3. **Folder Action Icons** (change depending on tab/folder)
   - Hover over icon to see the screen tip.
   - Grayed-out icons are not active/available.

4. **Folder Structure**
   - All folders/documents

5. **Customize and Search**
   - **<<** maximizes the screen layout.
   - Change displayed columns.
   - **Starts With** … to filter documents.
   - Sort by column heading (**Name, Document Title, etc.**).
   - Change column width.
   - **Items Per Page** (You can display 10, 50, or 100)
   - **Filter By** menu (e.g., Show All Objects, Show Primary Documents, Show Attachments)
   - **Quick Search**: Searches entire repository by document properties or content.

6. **View Icons**: Provide access to different functions and actions.
   - **Documents**: Personal and repository documents in personal, cabinet, folder, and file structure.
     **NOTE**: The current display is **Documents** view.
   - **My Tasks**: Your “to-do” items and notifications.
   - **Reports**: Run and display standard and custom reports.
   - **Search**: More advanced options than **Quick Search**.
2.2: The Personal Tab

The Personal tab can be modified in many ways to suit the individual user’s needs.

Creating folders under your Personal cabinet shows you to organize your various in process documents, which is similar to having folders and subfolders on your computer or within your email.

Creating a New Folder under Your Personal Cabinet:

1. Within the Personal tab, click on the New Folder icon
2. Enter a name for the new folder
3. Click the Finish button

The folder appears under your Personal cabinet. Documents saved in the folder will be removed from the folder once they are fully executed.

Deleting a Folder under Your Personal Cabinet

To delete a folder under your Personal cabinet:

1. Within the Personal tab, click on the folder name that you wish to delete.
2. Click on the Delete folder icon.
   
   NOTE: A folder can only be deleted if it has been emptied of its contents.
3. In the Delete window, choose whether you want to Delete Current Versions or Delete All Versions of the documents.
4. Click the Delete button.

The folder disappears from under your Personal cabinet.

NOTE: If subfolders exist, each subfolder must be deleted individually before the folder can be deleted.
**Changing number of items in Personal Tab**

The number of items displayed in the **Personal** tab (and other tabs and views throughout iCS) can be changed by clicking on the **Items Per Page** menu.

**Sorting Items**

Items can be sorted by any column heading. By default, items are sorted by the Name heading, ascending (a - z).

1. Click the column heading to use for sorting.
2. The **Up Arrow** icon indicates items are sorted in ascending (a - z) order. The **Down** arrow icon indicates items are sorted in descending (z - a) order.
3. Click the column heading again to sort in reverse order.

**NOTE:** Current sorting is only retained until the view or tab is closed, refreshed or the user logs out of iCS.

**Column Widths**

Column widths can be made wider or narrower by horizontally dragging delimiters, which are vertical lines in the column header row. Horizontal arrows appear when hovering the mouse over the delimiter.

**NOTE:** The changed width is remembered and displays again at the user’s next login.

---

**Attachments Folder**

iCS automatically generates an **Attachments** folder in the user’s **Personal** tab when a user creates/imports a related document/attachment. If the user deletes an item from this **Attachments** folder while the contract is still in development, it will also be deleted from the related documents of the contract. When a contract is fully executed, the attachments will auto-file to the **Contracts** cabinet, along with the contract itself, and will disappear from the user’s **Attachments** folder. Related documents are covered in greater detail throughout this guide.
2.3: Cabinets Tab

The Cabinets tab displays public cabinets containing fully executed contracts, in addition to other repository documents.

Users can navigate the cabinet hierarchy using the folders below to access a fully executed contract or related document. Not all Cabinets are public and your view of available cabinets and the documents stored within depends on your level of permission in iCS.
Section 3: Creating and Importing Documents

There are three ways to initiate contracts in iCS:

1. Creating a contract from an approved template
2. Importing an existing contract
3. Creating a contract request (covered in Section 4.1)

Contract Confidentiality
If a contract has unique confidentiality requirements or restrictions, please contact your contract processing office before initiating the contract in iCS.

3.1: Creating a Contract from an Approved Template

Contract templates are pre-approved by the contract processing offices and University Counsel. iCS templates are available under the New Document icon.

All users have access to these standard University of Illinois System templates:

- Revenue Generating Services Agreement under $10,000
- Procurement of Services Agreement under $10,000
- Revenue Generating Services Agreement $10,000 or more

Some units have additional custom templates available only to users in their chart and org.

Creating a new contract with an iCS Template

1. Navigate to the folder within the Personal tab where you would like the contract to be stored while in development.
2. Click the New Document icon.
3. Within the New Document Template Selection window, select the:
   a. Template Type: Select Contract
   b. Template Category: Select Payable, Receivable, or No Fund.
   c. Template Name: Select appropriate template.
4. Click the Next button.
5. Review and verify selected Clauses (not applicable to every template).
6. Click the Next button.
7. Enter information in all applicable fields on the Enter Info tab.
   IMPORTANT: The fields on this tab populate the resulting contract. An empty field will result in a blank field in the contract. Use complete sentences, correct spelling, grammar, etc. Be as complete and detailed as possible.
8. Click the Next button.
9. Enter information in all applicable fields on the Set Properties tab.
   IMPORTANT: The fields on this tab populate the contract metadata. Metadata is used in searching and reporting. These fields have all been determined to be critical in those functions. Fields marked with a red asterisk are required.
   NOTE: There may be a time delay for iCS to refresh some fields (e.g., Organization Code).
10. Click the **Next** button.

11. Click the **Finish** button.

**NOTE:** The document appears within the **Personal** tab in the folder selected in Step 4.

### 3.2: Importing an Existing Contract

Import a contract when you receive another party’s contract, or a hard copy of a contract from a user who does not have access to iCS.

1. Navigate to the **Folder**, within the **Personal Tab**, where you would like the contract to be stored while in development.

   **NOTE:** If the document is not in an electronic format, it will need to be scanned and uploaded as a PDF.

2. Click the **Import** icon.

3. In the **Import: File Selection** window, click the **Choose File** button.

4. Find the file to be imported then
   a. Double-click it to open it.

   **OR**
   b. Click it to highlight it and then click the **Open** button.

5. Click the **Next** button.

6. In the **Import: Object Definition** window:
   a. Select **Contract** in the **Type** field.
   b. Enter information in any other applicable fields.

   **IMPORTANT:** The fields on this tab populate the contract metadata. Metadata is used in searching and reporting. These fields have all been determined to be critical in those functions. Fields marked with a red asterisk are required.

7. Click the **Finish** button.

---

**Does that document belong in iCS?**

If you have a document and you are unsure about whether it should be imported into iCS (for example, a hotel room block agreement, or a banquet event order), enter the requisition in Banner and route that to Purchasing with the document attached. The buyer will analyze the document, and if they determine that it does need to be imported into iCS, they will let you know.
### More on Metadata

- Metadata is entered on the **Set Properties** tab.
- Metadata is used in searching and for reporting.
- Master reports are given to AVPs, university administrators, internal and external auditors.
- When entering metadata:
  - Not every field is required, but users should enter as much data as possible.
  - Always use proper spelling and grammar.
  - Do not use dollar signs or commas when entering dollar amounts.
  - Avoid using punctuation in the **Contracting Party Name** field.
  - Avoid using parenthesis in the **Title**, **Contracting Party Name**, and **Unit Name** fields.
- In the **Document Title** field, use the standard naming conventions set by your unit, if applicable. For Purchasing contracts, always include the Banner Requisition Number in this field.
- Do not complete the sections for University Contract Records Office (UCRO) or Capital Programs.
- See [Appendix D](#) for metadata descriptions.
Section 4: Creating Contract Requests/Requesting Amendments

4.1: Creating a Contract Request

When you do not have an existing contract or an available template, you should create a contract request and submit it to the appropriate contract processing office, who will create a contract from the information you provide.

To create a contract request, complete the following steps:

1. Navigate to the folder within the Personal tab where you would like the contract request to be stored.
2. Click the New Document icon.
3. When the New Document: Template Selection appears:
   a. In the Template Type field, select Contract Request.
   b. In the Template Category field, leave as Any Category (no other selections available).
   c. In the Template Name field, select appropriate template type.
4. Click the Next button.
5. Enter information in ALL applicable fields on the Enter Info tab.
   IMPORTANT: The fields on this tab populate the resulting contract request form. A buyer or coordinator will use this information to create the contract. Use complete sentences, correct spelling, grammar, etc. Although not all fields are required, missing or incomplete information may cause a delay in the processing of your contract. Be as complete and detailed as possible.
6. Click the Next button.
7. Enter information in ALL applicable fields on the Set Properties tab.
   IMPORTANT: The fields on the Set Properties tab populate the contract request metadata. Fields marked with a red asterisk are required. Use complete sentences, correct spelling, grammar, etc. Be as complete and detailed as possible.
   NOTE: There may be a delay for iCS to refresh the screen (e.g. organization code).
8. Click the Next button.
9. Click the Finish button.
4.2: Requesting an Amendment

An amendment changes the substantive legal terms of a fully executed contract. Common examples include extending the contract term or changing the contract amount.

Amendments are created as a related document to the fully executed original contract. Once created, an amendment is routed for approvals and execution using the same process as new contracts. Units can view an amendment and track its status by navigating to the fully executed original contract, opening the dashboard, and clicking on Related Documents. For quicker access to an amendment, you can add it to your Favorites tab by right-clicking on the Document icon and selecting Add to Favorites.

If you need to request an amendment to an existing contract, send an email to the office in which the original contract was processed (the contract processing office can be found by looking at the “OBFS Office” line on the contract jacket). Find contact information on the iCS Resource Page under Who-to-Ask (www.obfs.illinois.edu/ics-resources/who-to-ask/). Include in the email the contract number of the existing contract, in addition to the required changes (see common examples above). Be sure to attach any documents supplied by the other party.

The contract request can also be used to submit requests for amendments.
Section 5: Routing Documents

This section details the two options for routing iCS contracts for review, approvals, and signature. Those routing processes are:

1. Routing via checklist
2. Routing to others outside of iCS

5.1: Routing via Checklist

The checklist functions in much the same way that the Contract Approval/Routing Form (CARF) does for contracts routed outside of iCS.

Dashboard before adding a checklist.

Dashboard after adding a checklist.
1. Click the **Open Dashboard** icon next to the contract, or right-click the contract and select **Open Dashboard**.

2. Select the **Checklist** icon.

3. Click the **Add Checklist** link.

4. Within the **Select Checklist** window, select the:
   - **Checklist Type** (Contract)
   - **Checklist Category** (No selections available; leave blank)
   - **Checklist Name** (Refer to Appendix B: Checklist Descriptions)

5. Click the **OK** button.

6. Select the **Assign Item** link next to the Item Name you wish to assign, or right-click on the item name and select **Assign Item** from the actions menu.

7. In the **User/Role** field, either type the name of the user or the role to which you would like to assign the item, or click the **Down** arrow and scroll through the list of options.

8. In the **Reject To** field, either type the name of the user or the role you would like to receive notification if the item is rejected by the assignee, or click the **Down** arrow and scroll through the list of options.

9. In the **Notify When Complete** field, either type the name of the User or the Role you would like to receive notification when the item is completed, or click the **Down** arrow and scroll through the list of options.

   **NOTE:** Refer to the UIUC Checklists Cheat Sheet for assistance in selecting the correct role for each checklist task.

10. In the **Due Date** field, either type a date or, choose a date using the **Calendar** icon.

   **IMPORTANT:** When assigning the **Assign to OBFS Reviewer** task to an OBFS role, it is recommended that you choose a due date two business days from the date you assign the task.

11. Click the **Assign Item** button.

   **NOTE:** At this point, the person(s) in the role to which this task has just been assigned receives an iCS notification in their **My Tasks** list, as well as an email notification.

12. Click the **Close** button.

When the assigned item in the checklist has been completed, the user or role entered in the **Notify When Complete** field will receive an iCS notification in their **My Tasks** list, as well as an email notification.

13. Within the **Personal** tab, click the **Open Dashboard** icon next to the contract or right-click the contract and select **Open Dashboard**.

14. Select the **Checklist** icon.
15. Repeat Steps 6-12 for each item to be completed on the checklist.

**Important Notes about Checklists**

- Not all checklist items are mandatory. Some items only apply to certain contracts (e.g. dean/director approval is only required for contracts $50,000 or more).
- Checklist tasks must be assigned and approved one at a time. However, checklist tasks do not always have to be done in sequential order.
- The Comptroller Signature step should not be assigned until after all other required University approval steps have been completed.

**Adding Checklists to a Document**

One or more checklists may be added to a single document. You can add a second checklist to a document by clicking the Add Checklist link and choosing another checklist from the Checklist Name: menu. Any number of different checklists may be added to any document of any type, with all added checklists displayed in the Checklist window. Each checklist may be added only once.

**Removing a Checklist**

If you inadvertently select the wrong checklist, it can be removed from the document as long as no items on the checklist have been completed. To remove a checklist from a document, contact the University Contract Records Office (UCRO) at contractrecords@uillinois.edu and provide them with the contract number and name of the checklist that you would like to have removed.

**Completing Checklist Items**

Some checklist items are tasks that a user will complete on their own, instead of being assigned to another user (e.g. Send contract to other party for signature or Import signed contract). You do not have to assign these tasks to yourself. You can simply right-click on the task name and select Complete Task (once you have completed the task). Enter comments, if desired, and click OK. Your name and the date will populate the checklist item information and the task will be marked as complete.

**Reassigning Checklist Items**

Checklist items may be reassigned at any point before they have been completed. To reassign an item, navigate to the checklist and click the Reassign Item link next to the task you wish to reassign. Repeat the steps for assigning the task.

**Unassigning Checklist Items**

Assignees can unassign checklist items at any point before they have been completed. To unassign an item, navigate to the checklist and click the Unassign Item link next to the task you wish to unassign.

If you need to unassign a checklist item but are unable to, contact the University Contract Records Office (UCRO) at contractrecords@uillinois.edu and provide them with the contract number and checklist item that you would like to have unassigned.
### Resetting Checklist Items

Checklist items may be reset by the University Contract Records Office (UCRO) at any point before the contract is fully executed. If you need to have an item on your checklist reset, contact UCRO at contractrecords@uillinois.edu and provide them with the contract number and checklist item that you would like to reset.

After a task is reset, the completion information is removed from the checklist but remains in the audit trail. If the task requires electronic signoff, you must input your password in order to reset the item. The item remains assigned to the original assignee and that user receives a notification that the task has been reopened and is incomplete. If you wish to send this task to a different user for completion, you must reassign it.

### Routing for Comptroller Signature

When a contract is ready for the executing university signature, the **Contract Signature** task in the checklist must be assigned to the appropriately authorized role.

Certain templates under $10,000 have been approved for unit head execution. This includes the standard Revenue Generating Agreement less than $10,000, the Procurement of Services Agreement less than $10,000, and those unit-specific templates less than $10,000 that have received express written authorization from the Assistant Vice President for Business and Finance.

The above standard contract templates less than $10,000 (if unaltered) must be printed and have signatures applied by hand. Unit heads will sign their and the comptroller’s names on these standard contract templates. The contract must then be scanned and imported into ICS as a new version, and have all remaining checklist items completed.

All other contracts must be routed to the appropriate contract processing office for comptroller signature.

**NOTE:** Refer to the UIUC Checklists Cheat Sheet for assistance in selecting the correct contract processing office role for the contract signature checklist task.

**IMPORTANT:** If changes are made to a standard contract template less than $10,000, the contract cannot be executed by the unit head. Instead, the **Contract Signature** task must be assigned to the appropriate contract processing office for comptroller signature.

### 5.2: Routing to Others Outside of iCS

Certain situations may require a contract to be routed outside of iCS. Examples include when the other party’s signature is required or when review or approval is needed from a user who does not have access to iCS. There are two options for sending a contract to someone outside of iCS:

1. Saving a Local Copy
2. Emailing as an Attachment

**Saving a Local Copy**

1. After logging in to iCS, click the **Documents View** icon (if necessary).
2. Right-click the contract and select **Save a Local Copy**.
3. Select a location to save the contract and click the **OK** button.
4. Send the contract as an email attachment for review or signature.
Emailing as an Attachment

1. Right-click the contract and select Email as an Attachment.

2. Type the email address(es) to which you would like to email a copy of the current version of the contract in the To: field.
   
   **NOTE:** You will not have access to your address book if you use this method.

3. Type your email address in the Cc: field (see important note below).
   
   **IMPORTANT:** A copy of the email will not appear in your Microsoft Outlook Sent Items folder. If you require a copy of the communication for your files, you will need to CC yourself.

4. Type the desired text in the message box.
   
   **NOTE:** When sending emails through iCS, message text will appear as a single line. The system doesn’t create paragraph breaks or “hard returns” after pressing the Enter key.

5. Check the Checkout Document After Send box if you would like the system to automatically check the document out for you.

6. Click Send.

**NOTE:** The Audit Trail will reflect an email as attachment action capturing the date, time, and recipient email addresses. When the contract returns to you, if any changes have been made, including a signature added by another party, you must version the contract (see the Versioning section).
Section 6: Managing Documents

6.1: Viewing a Contract or Contract Request
To view a contract that has not been fully executed or a contract request, follow these steps:
1. From the Personal tab, navigate to the appropriate folder (if applicable).
2. From the list of documents, locate the document you created.
   NOTE: If you are not the creator of the document, you must perform a search for it. See the Searches section for additional information.
3. To view the contract or contract request, click on the View link.

6.2: Checking Out a Document and Canceling Check Out
Once you have created a document, you may prevent other users from making any changes to it by checking out the document.

Checking Out a Document
1. Select Documents View icon (if necessary).
2. In the Personal tab,
   a. Click the Check Out link next to the contract or contract request you wish to check out.
   OR
   b. Right-click and select Check Out from the menu that appears.
   A key icon will display next to the document, indicating that you have it checked out.

When to Cancel Check Out
Cancelling a check-out will revert the document to its exact state when you checked it out.
You can cancel check out of a document if you:
1. Do not want to save the changes you made to the document.
2. Did not make any changes.

Canceling Check Out
1. Select Documents View icon (if necessary).
2. On the Personal tab, right-click the document name.
3. Select Cancel Check Out.
   NOTE: You may only cancel check out for documents that you have checked out. You cannot cancel the check-out of another user. Documents checked out by another user will display a padlock icon.
Checking in a document will create a new version of the document (see the section on Versioning).
6.3: Checking In and Versioning a Contract

ICS maintains every version of a document in the Versions tab of the document dashboard. The two most common instances when units create new versions of a contract are when the other party requests changes and when a unit receives a signed contract from the other party.

In order to create a new version of a document in iCS, the document needs to be in an electronic format. If the updated document is in hard-copy form, it needs to be scanned in so it can be uploaded as a PDF.

**IMPORTANT:** The following steps assume the contract is already checked out. A contract must be checked out before a new version can be imported.

1. Right-click the document and select **Check In**.
2. In the **Save as** field, select **2.0 (major version)**.
3. In the **Check in from file** field, click the **Browse** button.
4. Find the contract in the File Explorer window that appears.
5. Open the file by
   a. Double-clicking it.
   OR
   b. Clicking it once to highlight it and then clicking the **Open** button.
4. Add log entry (if desired).

**NOTE:** Information (such as date, amount, etc.) carries over but can be edited if necessary.
5. Click the **OK** button.
6.4: Editing and Versioning a Contract or Contract Request

Selecting Edit (either by right-clicking on a document or clicking on the Edit link in the document menu) opens a document for changes, but only if editing is allowed at the document level (i.e. an unprotected Word document).

When templates are loaded into iCS, they are loaded as protected Word documents. This allows users to view and complete the templates in iCS, but does not allow them to edit any of the text outside of the form fields. Only staff in the contract processing offices and University Counsel have security permission and ability to edit contracts created in iCS using templates. If contract requires changes beyond its form fields, you must route that contract to the appropriate contract processing office.

Template form fields can be edited while a contract is still in development by users with sufficient permission levels.

**Making Changes within Form Fields**

1. Open the document’s dashboard.
2. Click the Version from Original Template icon. This will take you back to the Enter Info tab, which appeared during the creation process.
3. Make the necessary changes on the Enter Info tab and click Next.
4. You will also have the opportunity to make changes on the Set Properties tab. If no changes to the jacket properties (metadata) are necessary, click Next.
5. Click Finish.
6.5: Document Dashboard

Opening Document Dashboard

There are three ways to open a document’s dashboard:

1. Right-click the document name and select **Dashboard**.
   OR
2. Double-click the document name.
   OR
3. Click the **Open Dashboard** icon.
Jacket Properties/Metadata

Upon opening, the document dashboard displays the jacket properties, also referred to as the document metadata. See the following pages for an explanation of each area.

1. **Available Actions**
   - **View**: Displays a read-only version of the document.
   - **Edit**: Checks out the document and makes it available for modification.
   - **Check Out**: Assigns the document to the specific user and locks the document from editing by other users.
   - **Check In**: Unlocks the document and returns the document to the cabinet. The document is now available to be edited by other users.
   - **Cancel Check Out**: Returns the document to the cabinet and discards any changes made after the document was checked out. The document is now available to be edited by other users.
   - **Version Using Original Template**: Creates a new version of the document from the original template.
   - **Email**: Allows the user to send the document via email.
   - **Predefined Routing**: *The University of Illinois System does not use this feature.*
   - **Ad Hoc Routing**: Units do not use this feature.
   - **Add to Favorites**: Adds a link to that document to user’s Favorites tab.
   - **Auto File**: Moves a document to a specific cabinet location as defined by its applicable auto-file rule.

2. **Jacket Actions**
   - **View Properties**: Allows you to view the jacket properties (metadata).
   - **Edit Properties**: Allows you to make changes to the jacket properties (metadata)
   - **Print Properties**: Allows you to print the jacket properties (metadata)
   - **Sign off**: *The University of Illinois System does not use this feature.*
3. **Functions**

- **Jacket**: Displays the metadata (jacket properties) of the document.
- **Related Documents**: Displays other documents (amendments, attachments, supporting documentation, etc.) related to the contract.
- **Notes**: Can be added to a contract, or read and printed by others.
  **IMPORTANT**: Notes are read-only and once saved cannot be changed or deleted.
- **Reminders**: Remind of actions that are not material obligations of the contract (e.g. review a contract for renewal two months prior to the contract end date).
- **Obligations**: Remind of legal requirements of the contract (e.g. invoice due on a certain date).
- **Checklists**: Primary routing mechanism for contracts in the system (similar to the Contract Approval/Routing Form).
- **Workflows**: Displays ad hoc workflows, including their current status.
- **Versions**: Displays all versions of that contract, the date and time they were saved, and the name of the creator.
- **Audit Trail**: Captures every step in the contract’s life cycle, as well as detailed information about the date, time, and performer.
- **Property History**: Shows a quick comparison of jacket properties (metadata) and any changes made to the metadata between versions.
- **Contacts**: *The University of Illinois System does not use this feature.*
6.6: Related Documents
A user can import supporting documentation that relates to a contract (e.g. proposal, certificate of liability, email, etc.) in the Related Documents area of the document dashboard.

NOTE: Contract processing offices will be creating amendments as related documents.

Import a Related Document:
1. Within the document dashboard, click the Related Documents icon.
2. Click the Import Related link.
3. Click the Add Files button.
4. Find the file to be imported and double-click it.
   OR
   Click it once to highlight it and then click the Open button.
5. Click the Next button.
6. Select Attachment as the relationship.
7. Select Attachment as the type.
8. Complete all fields.
9. Click Finish.

6.7: Notes
Notes allow you to add a permanent, non-editable record of relevant information to a contract.

Adding a Note
1. Within the document dashboard, click the Notes icon.
2. Click the Add Note link.
3. Select the appropriate category.
4. Enter the note text.
5. Click OK.

IMPORTANT: Notes are read-only and once saved cannot be changed or deleted.
6.8: Reminders and Obligations

Reminders and obligations are useful “memory jogs” that actions are required on a certain date for a particular document. Reminders and obligations must be added manually.

Reminders

Reminders notify you of actions that are not material obligations of the contract. For example, you can add a reminder to review a contract for renewal two months prior to the contract’s expiration.

When a reminder is added to a document, a task is scheduled to occur at some date in the future. On that date, an email message describing the task will be sent to the specified recipient(s) and a notification will appear in their My Tasks list(s). Reminders can be assigned to one or more users by name, or to an iCS role (e.g. 1_100_requestor) in which case all users assigned to that role at the time the reminder becomes due will receive the notification. Additionally, if a reminder is created with the Add to Outlook Calendar option, each user on the reminder distribution list can choose to add that event to their Outlook calendar.

Adding a Reminder

1. Within the document dashboard, click the Reminders icon.
2. Select the Add Reminder link.
3. Enter the following reminder details in the Add Reminder window:
   a. In the Notification date field, add the date when the user(s) will be sent the reminder email for the specified document.
   b. In the Document Dashboard menu, select the frequency that the reminder email is generated and sent to recipients on the distribution list:
      - None (default)
      - Weekly, Bi Weekly (every two weeks)
      - Monthly, Semi-Monthly (twice a month)
      - Quarterly, Semi-Annually (twice a year), Annually
   c. In the Action menu, select the category which will be listed on the reminder email.
   d. In the Instructions field, enter other information for everyone on the distribution list. This text will appear in the body of the email accompanying the task.
   e. In the Display Option menu, Select Show User or Show Roles, depending on how you want to create the distribution list.
   f. In the User / Roles: Dropdown List, click on the users or roles that will receive the reminder and then click the > icon (next to the box on the right) to add them to the distribution list.
      NOTE: The >> icon adds all choices in the User / Roles: Dropdown List to the distribution list. Use the << icon to remove individual recipients, and the << icon to remove all recipients from the distribution list.
   g. Check the Add to Calendar box to allow recipients to add the date(s) for the obligation to their Outlook calendars.
      NOTE: The email to add the reminder to the recipient’s Outlook Calendar sends immediately, even if the notification date is in the future.
4. Click OK.
Adding Reminder to Your Outlook Calendar

1. In Outlook, open the reminder email.
2. Double-click the prodagioEvent.ics icon in the Attachments line to open the attachment.
3. The scheduler notice displays as an Outlook calendar event.
4. Click Save and Close.

NOTE: You cannot add a reminder to your calendar in Webmail.

Viewing Reminders

Once a Reminder is created, the details of the reminder can be viewed.

1. Navigate to the document with the reminder(s).
2. Click the Reminders icon next to the document name; the Reminder window displays, listing all reminders for the selected document.
3. Select View.
4. When done viewing the details of the reminder, click Close.

Editing Reminders

1. Navigate to the document with the reminder(s).
2. Click the Reminders icon next to the document name; the Reminder window displays, listing all reminders for the selected document.
3. Select Edit.
4. Edit the details of the reminder as necessary.
5. Click OK.

NOTE: From the My Tasks view, users may change the notification date of open status reminders from the Reminder Task Manager windows.

Deleting reminders

1. Navigate to the document with the reminder(s).
2. Click the Reminders icon next to the document name; the Reminder window displays, listing all reminders for the selected document.
3. Select Delete.
4. Click Delete.

Closing Reminders

Once a scheduled Reminder has already occurred, the reminder cannot be deleted. It can only be closed.

1. Navigate to the document with the reminder(s).
2. Click the Reminders icon next to the document name; the Reminder window displays, listing all reminders for the selected document.
3. Select Close.
4. Under Closing Comments, include a comment to be recorded with the completed reminder (e.g. renewal completed).

5. Click OK.

Obligations

Obligations remind you of legal requirements of a contract. For example, you can set an obligation to remind you that an invoice is due on a certain date. When an obligation is added to a document, a task is scheduled to occur at some date in the future. On that date, an email message describing the task will be sent to the specified recipient(s) and the task will be added to their My Tasks list(s). Obligations can be assigned to one or more users by name, or to an iCS role (e.g. 1_100_requestor) in which case all users assigned to that role will receive the task notification when the obligation becomes due. Additionally, if an obligation is created with the Add to Calendar option, each user on the obligation distribution list can choose to add that event to their Outlook calendar.

Obligations require a user to input their password (or, electronically sign off) in order to complete them. Obligations are categorized as either financial (related to money) or non-financial (not related to money).

Adding an Obligation

1. Select Open Dashboard icon for the document you would like to add an obligation to.
2. Click the Obligations icon.
3. Click Add Financial Obligation or Add Non-Financial Obligation.
4. Enter the relevant information about the obligation in the General, Deliverables, and Write-Up sections.
5. In the Timing section,
   a. Select a Due Date.
   b. In the Recurring: menu, select the frequency of the obligation email to its distribution list.
   c. In the Total Obligations field (appears only when a recurring frequency is selected), enter the total number of times the obligation will be sent.
6. Click Next.
7. In the Lead Time menu, select the number of days of advance notice that obligation recipients will receive.
8. Check the Add to Calendar box to allow recipients to add the date(s) for the obligation to their Outlook calendars.
   NOTE: The email to add the obligation to the recipient’s Outlook calendar is sent immediately, even if the notification date is in the future.
9. In the Display Option menu, select if you want to add to the distribution list by user or role
10. In the User / Roles: Dropdown List, click on the users or roles that will receive the reminder and then click the > icon (next to the box on the right) to add them to the distribution list.
   NOTE: The >> icon adds all choices in the User / Roles: Dropdown List to the distribution list. Use the << icon to remove individual recipients, and the << icon to remove all recipients from the distribution list.
NOTE: An obligation can be set without selecting any recipients. If no recipient is selected, then no email and no task will be sent, but the obligation will remain in the document dashboard of the contract and can be viewed or edited by any user with security permissions sufficient to read the contract.

Adding an Obligation to Your Outlook Calendar

1. In Outlook, open the obligation email.
2. Double-click the prodagioEvent.ics icon in the Attachments line to open the attachment.
3. The scheduler notice displays as an Outlook calendar event.
4. Click Save and Close; the obligation is added to your Outlook calendar.

NOTE: You cannot add an obligation to your calendar in Webmail.

Viewing Obligations

Once an obligation is created, the details of the obligation can be viewed.

1. Navigate to the document with the obligation(s).
2. Click the Obligations icon next to the document name; the Obligations window displays, listing all obligations for the selected document.
3. Select View.
4. When done viewing the details of the obligation, click Close.

Editing Obligations

1. Navigate to the document with the obligation(s).
2. Click the Obligations icon next to the document name; the Obligations window displays, listing all obligations for the selected document.
3. Select Edit.
4. Edit the details of the obligation as necessary.
5. Click OK.

NOTE: From My Tasks view, users can change the due date of open status obligations from the Obligation Task Manager windows.

Deleting Obligations

1. Navigate to the document with the obligation(s).
2. Click the Obligations icon next to the document name; the Obligations window displays, listing all obligations for the selected document.
3. Select Delete.
4. Click Delete.

Closing Obligations

1. Navigate to the document with the obligation(s).
2. Click the **Obligations** icon next to the document name; the **Obligations** window displays, listing all obligations for the selected document.

3. Select **Close**.

4. Enter your password.

5. Enter a comment (e.g. *Invoice Paid*).

6. Click **OK**.

---

### 6.9: Subscriptions

Subscriptions are one way to keep tabs on contracts created by other users. To be alerted when a document is versioned, you can subscribe to that document. All documents to which you are subscribed are listed on the **Subscriptions** tab of the **Documents** view. When a subscribed document is versioned, you will receive email and **My Tasks** notifications.

**Subscribing to a Document**

1. Navigate to the document to which you wish to subscribe.
2. Right-click the document name.
3. Select **Subscribe to Changes**.

**NOTE:** Documents cannot be subscribed to from search results. If you wish to subscribe to a document in search results, add the document to your **Favorites** first (covered in the next section), then follow the steps to subscribe to the document from your **Favorites** Tab.

**Unsubscribe from a Document**

1. Navigate to a currently subscribed contract or contract request.
2. Right-click the document name.
3. Select **Unsubscribe to Changes**.

**NOTE:** Unsubscribing from a document will immediately stop email and My Tasks notifications when that document is versioned by other users and will remove the document from your **Subscriptions** Tab.

---

### 6.10: Favorites

Just as a web browser allows you to store a list of favorite web sites, iCS allows you to keep a list of favorite documents that you refer to frequently. You can add a document created by another user to your **Favorites** tab, so you can to quickly navigate to it later. All of your Favorite items will display in the **Favorites** tab of the **Documents** view.

**Adding a Document to Favorites**

1. Navigate to the document you wish to add as a favorite.
2. Right-click the document name.
3. Select **Add to Favorites**.
Removing a Document from Favorites

When you no longer require quick access to a document, remove it from the Favorites tab. Like a shortcut, removing an item from the Favorites tab removes only the shortcut, not the original item.

1. Navigate to the document you wish to remove as a favorite.
2. Right-click the document name.
3. Select Remove from Favorites.

6.11: Editing Document Properties

Many document properties (jacket properties or metadata) can be edited while a contract is still in development by users with sufficient permission levels.

Editing Jacket Properties (Metadata)

1. Right-click the document icon and select Properties.
2. The Properties window will display the jacket properties (metadata) in multiple tabs across the top.
3. Make the necessary changes on each tab and click the OK button.
Section 7: Managing Tasks

7.1: My Tasks

The My Tasks view provides a list of tasks and notifications assigned to you or notifications sent to you, which may have come from checklists, reminders, or obligations. The My Tasks view functions as your “to do” list and includes three tabs: My Tasks, Recent, and Favorites. Each user’s My Tasks listing is personal and lists overdue tasks in red in the Due Date column.

When a task is assigned to you, you are responsible for reviewing it and either performing the action, completing the task, or rejecting the task and providing instructions or explanation to the assigner as needed.

Email Notifications

Email notifications are sent when a task is assigned and when a user completes or rejects a task assigned to them, depending on what was entered when the task was assigned. Email wording is very similar, so please review each email carefully.

Examples of notification email in ICS:

Example 1 – From Unit Requestor assigning a task to Unit Head:

From: Sally Jones [mailto:sjones@uic.edu]
To: John Smith
Subject: Checklist Item Assigned - Contract - DIA - Test ( CN-00000523-01 v 1.1 )

A Prodagio Checklist Task was assigned to John Smith

Example 2 – From Unit Head to Unit Requestor task completed:

From: John Smith [mailto:jsmith@uic.edu]
To: Sally Jones
Subject: Checklist Item Complete - Contract - DIA - Test ( CN-00000523-01 v 1.1 )

A Prodagio Checklist Task was completed by John Smith
7.2: Reviewing Tasks

In iCS you can view and then complete, delete, or reject tasks assigned to you. To view the task assigned to you, complete the following steps:

1. Click the View Task link within the email notification and log in to iCS or click the My Tasks view icon in iCS.
2. Within the task:
   - Access the document dashboard, by clicking the Open Dashboard icon or right-clicking the contract and selecting Open Dashboard.
   - View the contract, by clicking the View link or right-clicking the contract and selecting View.
3. Click the Close button to return to the task.
4. Click the Close button again to return to My Tasks.

IMPORTANT: If you are reviewing a contract that was created by another user, the task is your link to that document. Be sure to keep the task in your My Tasks list (do not delete it) until you are finished and ready to complete it.

7.3: Completing and Rejecting Tasks

Completing

Completing a task will mark the checklist item complete, insert your name as the completer, and will remove the task from your My Tasks list.

Rejecting

Rejecting the task will remove it from your My Tasks list and reassign the task to the user who assigned it to you, or the user populated in the Reject To field at the time the task was assigned.

Deleting

Deleting the task will not mark the checklist item complete, but will remove it from your My Tasks list. The task will remain assigned to you and will return to your My Tasks list after a set period of time for as long as it remains pending.

Completing a Task Assigned to You

1. Click on the My Tasks icon (if necessary).
2. Select the View link. Review all information (e.g., the contract, jacket information, related documents, notes) before completing or rejecting the task.
3. Enter your password (if signoff is required).
4. Enter comments, if desired.
5. Click the Complete button; the task will be removed from your My Tasks list.

Rejecting a Task Assigned to You

1. Click on the My Tasks icon (if necessary).
2. Select the View link. Review all information (e.g., the contract, jacket information, Related Documents, Notes) prior to completing or rejecting the task.

3. Enter a comment (required) to describe the reason for rejecting the task.

4. Click the Reject button.

5. The task will be removed from your My Tasks list and will be reassigned to the original assigner for further action.

**Tips for Sorting and Managing Tasks**

- Sometimes a task is just a notification letting you know that someone else has completed a task that you assigned to them. Be sure to delete unnecessary items from your My Tasks list often.

- If you are reviewing a contract that was created by another user, the task is your link to that document. Be sure to keep the task in your My Tasks list until you are completely finished with the contract. You can also add the contract to My Favorites for easier access.

- Tasks can be sorted by column headings.

- The Hide/Resend Notifications link in the Actions bar in the Task List will filter your tasks to show only original task assignments and one reminder for each, hiding any tasks that are additional reminders.

- If you are logged into the system for an extended period of time, you may want to refresh your My Tasks list every so often. You can do this by clicking the refresh button on your browser or clicking on the My Tasks icon.

### 7.4: Assigning Proxies

If you are going to be out of the office or unavailable for an extended period of time, you can assign a Proxy in iCS. Your Proxy, not you, will receive all tasks assigned to you while you are out. Be sure to notify the individual that you have assigned them as your Proxy and that they will receive all tasks on your behalf.

**Assigning a Proxy**

1. Go to My Tasks.
2. Click the I am available link
3. Check the box next to I am currently unavailable. Please direct my tasks to:
4. Click the Edit link
5. Select the user by name (not role) you wish to assign as your proxy.
6. Click the OK button.
7. The link will change to I am currently set to unavailable.

**NOTE:** Any tasks assigned to your proxy will remain with your proxy until completed, unless they are reassigned by the original assigner.
NOTE: If you set an out-of-office automatic reply in Outlook, users that assign you tasks in iCS will also receive your Outlook out-of-office replies.

Unassigning a Proxy
When you return and/or become available:

1. Go to My Tasks.
2. Click the I am currently set to unavailable link.
3. Uncheck the box next to I am currently unavailable. Please direct my tasks to:
4. Click the OK button.

NOTE: The I am currently set to unavailable link will now display I am available.
Section 8: Reports

The Reports view provides and displays various reports, which can be downloaded and printed.

Generating a Report

1. Click the Reports View icon.

   NOTE: There are tabs for Reports and Custom Reports.

2. Within the Reports tab, select a report name from the list.

3. Enter the required criteria in the text boxes that appear to the right.

4. Click the Generate Report button to display the report results in the lower pane of the window.

   NOTE: The report results are links to active iCS data records. The Open Dashboard icon will go to the dashboard of that contract.

Printing a Report

1. Complete the Steps 1-4 of Generating a Report.

2. In the report results page, click the Printer Friendly View button.

3. In the Print window, select the printer; click the Print button.

4. Close the Printer Friendly View window.

Downloading a Report

1. Complete the Steps 1-4 of Generating a Report.

2. In the report results page, click the Download Report button.

3. Within the Export Contents to CSV windows, select columns to include in the report.

4. Click the OK button.

5. Select Open, Save, or Save As.

   NOTE: Must define a destination when selecting Save or Save As.
Section 9: Search

9.1: Quick Search

Quick Search is in the Personal and Cabinets tabs of the Documents view.

Quick Search provides “simple” searching. Use the Advanced Search function when looking for more specific criteria. Performing a quick search is the same as completing only the Contains field on the Advanced Search.

Performing a Quick Search

1. Within the Quick Search field, enter the search criteria (e.g., 1234 or ABC Company)
   To narrow the search, use:
   • Quotation Marks to find contracts with the exact word or phrase.
     Example: ABC Company
   • “And” to find contracts containing both words.
     Example: ABC and Company
   • “Or” to find contracts with at least one of the words.
     Example: ABC or Company
   • “Not” to find contracts with one word but not the other.
     Example: ABC not Company

2. Click the Go button.

NOTE: All documents listed in the search results have full functionality. It is not necessary to return to Documents view to display documents.

9.2: Advanced Search

The Search view provides searching by document properties (metadata) for any document in the repository. All searches require certain information to be entered before the search can display results. Entered information filters all information in the repository and displays only matching results. All individual user searches can be named and saved, and can be available to all users. The Search view has three tabs: General, My Saved Searches, and All Saved Searches.

Advanced Search should be used if you need to search using multiple fields. There is no known maximum for the number of parameters that can be used in an Advanced Search. The default when using Advanced Search is for all documents.

Performing and Advanced Search

1. Click the Search view icon (if necessary).
2. On the General tab, enter the search properties for each needed field of information
   
   NOTE: To search based on additional properties, click Add another property.

3. Click the Search button

Customizing Search Results

Your search results display can be customized by clicking on the Column Preferences icon. The columns or properties that you select to display will be the same properties available when using the Export to CSV option.
NOTE: All documents listed in the search results have full functionality. It is not necessary to return to the Documents view to display a document.

9.2: Save Search

1. Search for contracts using the quick search or advanced search feature.
2. On the search results page, click the Save Search icon.
3. Within the Save Your Search window,
   a. Fill in the Name field.
   b. Fill in the Description field.
   c. Check the Include Results box if you want to save the results of your current search, not just the search parameters.
   d. Check the Make Public box if you want to make the search available to others.
   e. Click OK.

9.3: Manage Saved Search

1. Click the Search View icon (if necessary).
2. Select the My Saved Searches tab.
3. Click the Search link to run saved search and view its results.
   OR
   Click the Edit, Remove, or View Saved Results links.
Glossary

**Acquired**
A task status indicating that the performer has opened the task, but has not yet completed the task. Compare with dormant.

**All Saved Searches**
Searches uniquely titles users have saved. All saved searches are available to all users.

**Ascending**
Alphabetical order, from a–z, used to sort information by column.

**Asterisk**
Indicates that a field’s information is required and must be entered.

**Attribute (properties, metadata)**
A characteristic defining a document. Example attributes are document name, authors, and title. Attributes are also often referred to as properties or metadata.

**Audit Trail**
A listing of all actions that have been taken on a selected document. The audit trail is read-only; it cannot be edited or deleted.

**Auto File**
Moves a document to its proper location, as determined by the document’s category and type properties (metadata). A contract is auto-filed when its status changes to fully executed. It is critical that this not happen before the contract image has actually received all of the necessary signatures.

**Cabinets Tab**
In the Documents view, the Cabinets tab displays all public cabinets. These cabinets store all folders, subfolders and related contracts and documents available to users based on their security access. The cabinets are structured by chart, three-digit org, then contract type.

**Check In**
Saves a file in the repository after it has been checked out for revision. After check in, a document is available to all users.

**Check Out**
Padlocks a file in a repository so neither the document nor its attributes can be edited by other users. Downloads the document’s content to the user’s computer for editing. Checked-out files are stored by default in the C:\Documents and Settings\Your name\Documentum\Checkout folder. Changes made to a file’s attributes or content are not saved in the repository until the file is checked in.

**Checklists**
A uniquely named set of business process tasks assigned to a contract. Checklists control the routing of the contract to various groups or individuals.

**Clauses Tab**
On the Documents view, theClauses tab displays a list of external clauses that may be used when building contracts or contract templates. Clauses are stored and updated by OBFS.

**Clipboard**
A holding place for multiple documents, with a separate clipboard for each user. Most common uses for the clipboard are copying and moving, particularly from the Personal to the Cabinets tabs.
CSV
Comma separated variable, a standard, basic spreadsheet format in which tabular information is separated by the comma character, and is exported from and imported into the system.

Dashboard
The document dashboard is the highest-level display for each document and includes available document actions, available document features, links of available jacket actions, high-level document jacket properties.

Delegate (workflow task)
A feature allowing checklist tasks to be assigned to a different user.

Descending
Reverse alphabetical order, from z–a, used to sort information by column.

Document Action Icons
Clickable icons providing access to all actions available for the selected document. Most of these actions are found on the document dashboard.

Document Action Menu
The document action menu can be accessed with a right-click of the item name.

Document
Any file with content that resides in iCS such as a contract, attachment, spreadsheet, memo or email.

Document Numbers (document versions)
Automatically assigned, sequential and configured to generate specific numbers based on organizational rules. The University of Illinois System contract numbering scheme includes a two letter prefix, a five-digit number, a two-digit sub-number (for amendments) and a version number.

Documents View
The main Prodagio contract view for users, which includes seven tabs and access to the three other views.

Document Type
A grouping or categorization of documents that is similar in format, content and/or purpose. Document type is an important metadata property.

Dormant
A task status indicating that the performer has not yet seen the task. Compared with acquired.

Favorites Tab
A shortcut to the file, not the original file. On the Document view, the Favorites tab displays all cabinets, folders, and files “bookmarked” by the user, to better enable quick access.

Import
Bring in a document from outside of iCS and add it to the repository.

Item
A general term used to describe all documents (of all types), tasks, obligations, and reminders displayed in various windows on which an action can be taken.

Jacket
The document folder listing all document properties. Allows changing these properties if user has write permissions.
Links
On various windows, underlined words which, when clicked, jump the user to another window. For example: Edit, Check Out, Preferences.

Locations
A document action menu selection which lists all places (locations) in the cabinet and folder structure where a document is stored.

Metadata (properties, attributes)
Information about a stored document such as its author, subject, and creation date. Metadata, also called properties or attributes, can be used to locate the document during a search.

My Saved Searches
Uniquely titled searches which you have saved and are available to all other users.

My Tasks View
A “to-do” list of all items and tasks requiring a user’s attention, including checklist tasks, subscribe notifications, reminders and obligations.

Notes
Permanent notes added to a document for others to view. All users with access to the document can view the notes written by all other users. Notes cannot be deleted once they are created.

Notifications
Notifications display on your My Tasks view and are generated each time a user changes a document to which you have subscribed.

Obligations
Tasks that must be completed in order to meet the legal requirements of a contract. Obligations are mandatory. Contrast with reminders.

Open Status
A reminder, obligation, or checklist task that a user has not completed. Users must view a task to open it.

Open Dashboard
An icon displayed after an item name on a view listing or after an item name in reports results. If clicked, the item (usually a document) dashboard displays. Performs the same action as the right-click Open Dashboard selection.

Permissions
Access privileges that determine what operations a user can perform on a file (such as: view, edit, and delete). For example, a unit requestor, unit head, and purchasing buyer each have differing levels of permissions.

Personal Tab
The default Tab displayed on the Documents view. The Personal tab displays a cabinet only available to the logged-in user, and is usually where that user creates new documents before they are fully executed.

Properties
See metadata or attributes.

Property History
Provides a way to review the complete history of every property in a document, as well as “backtracking” to view when each property change was made.
Quick Search
Provides searching for all principal documents that match entered key words. Displays on the Documents view’s Personal tab and Cabinets tab and can be used to limit the objects displayed on each tab.

Recent Tab
On the Documents view, the Recent tab displays files the user has most recently accessed, regardless of the file location, including files created, edited or checked out.

Refresh Checklist
Removes from the selected document all not yet completed checklist items and any new items from the rebuilt checklist are added (unless these new items match any of the currently checked items in the checklist).

Reminders
Useful “memory jogs” for yourself or for others to take some action on a particular document. Reminders are “ticklers”, and are not mandatory. Contrast with obligations.

Renditions
A copy of the original document in a different format, such as PDF. For example, if an original document is stored in Microsoft Word format, the same document saved as an Acrobat PDF file is considered a rendition of the original. Especially useful for external routing, when control of the document format is required and editable master documents should not be routed.

Repeating Attribute
A property that can have more than one value. For example, a document’s “authors” property is a repeating attribute because a document can have more than one author.

Reports - custom
Unique reports custom-configured for the University of Illinois System.

Reports - standard
Standard reports available to all users. Additional standard reports can be added.

Reports View
Provides access to all standard and custom reports.

Reset Item
Reopening a completed checklist item from the Checklist window.

Repository
The database of iCS information. A central location that allows users to store documents of any kind—text, graphics, and scanned images. A repository holds both document content and information about a document (metadata), such as its author, subject, and creation date, usable to locate the document.

Scheduled status
A reminder or obligation task that is scheduled to occur in the future. No notifications have yet been sent.

Search
Under the Search view, identify the unique configuration of search parameters and run the search.

Search View
Provides access to all search capability, as well as to all previously saved individual and group searches.

Signoff
A documented approval initiated by entering your log in password. Signoffs may be required for certain tasks during checklists and obligations processing.
Subscription
Turning on email and My Task notifications to alert the subscriber when a document or documents are changed by any user.

Tasks
Actions to complete, usually found on your My Tasks view, including reminders, obligations and checklist tasks.

Templates Tab
On the Documents view, the Templates tab displays the contents of the Templates cabinet, housing a library of Templates used to create contracts. Templates are stored and updated by OBFS.

Templates
A model, previously prepared and stored, used to create new contracts. Templates provide an input form or forms for variable information to be added. Templates are dynamic documents, containing many instances of variable content. Some templates are available to all users, while others are created for a specific unit.

Type
A grouping or categorization of documents that is similar in format, content, and/or purpose. Type is a common metadata property.

User Preferences
Provides access to changing the default user display. Available from any view or document dashboard with the Preferences link. Once changed by a user, the changes remain in effect at each log in until changed again by the user.

<tr>
<td><strong>Nondisclosure Agreements (Non-Research)</strong>: Agreements outlining the treatment of each party’s confidential or proprietary information. Also commonly referred to as confidentiality agreements.</td>
<td></td>
</tr>
<tr>
<td><strong>General</strong>: Must be executed prior to university conducting business with another entity. University may be providing or receiving services.</td>
<td></td>
</tr>
<tr>
<td><strong>Procurement</strong>: Must be executed prior to the university purchasing goods or services from another entity.</td>
<td></td>
</tr>
<tr>
<td><strong>Professional &amp; Artistic Services (Purchasing)</strong>: For Purchasing contracts only. Agreements used when a non-university system employee will provide a specific service, or services, and will receive payment for their work. Professional &amp; artistic services (P&amp;A) are primarily intellectual in nature.</td>
<td></td>
</tr>
<tr>
<td><strong>Accounting</strong>: Purchase of accountant, auditor, billing, or collection services.</td>
<td></td>
</tr>
<tr>
<td><strong>Law</strong>: Purchase of administrative law judge, arbitrator, attorney, court reporting, hearing officer, law clerk, and other legal services. Agreements for legal services must be processed by the Office of University Counsel.</td>
<td></td>
</tr>
<tr>
<td><strong>Artistic</strong>: Purchase of art and historical objects repair, maintenance and restoration; commissions for paintings or other artwork that would not be included in graphic design; entertainment limited to performances requiring extraordinary skill and expertise, including guest speakers and presenters; commissions for music composition; and sculptor services.</td>
<td></td>
</tr>
<tr>
<td><strong>Management/Administrative Services</strong>: Purchase of actuary, banking, bookstore operations, consultant-management, economist, executive search, investment services, and training/development services.</td>
<td></td>
</tr>
<tr>
<td><strong>Clinical Psychology</strong>: Purchase of psychiatrist or psychotherapist services.</td>
<td></td>
</tr>
<tr>
<td><strong>Marketing/Media Services</strong>: Purchase of audio/video production, photography requiring a high degree of professional and artistic expertise (can include photography for public relations and marketing projects), editor, graphic designer, media consultant, and public relations services.</td>
<td></td>
</tr>
<tr>
<td><strong>Information Technology</strong>: Purchase of information technology consulting, technical support, network design, programmer, and systems analyst services.</td>
<td></td>
</tr>
<tr>
<td><strong>Medicine</strong>: Purchase of audiologist, chiropractor, coder/coding, dietician, temporary medical staffing, medical transcriber, nurse, occupational therapist, optometrist, orthopedist, pathologist, pharmacist, physical therapist, physician, podiatrist, radiologist, surgeon, and veterinarian services.</td>
<td></td>
</tr>
<tr>
<td>Type</td>
<td>Subtype</td>
</tr>
<tr>
<td>------</td>
<td>---------</td>
</tr>
<tr>
<td><strong>Dentistry:</strong></td>
<td>Purchase of dentist, orthodontist, and periodontist services.</td>
</tr>
<tr>
<td><strong>Science/Research:</strong></td>
<td>Purchase of archaeologist, biologist, botanist, chemist, educator, entomologist, historian, and other science/research services.</td>
</tr>
<tr>
<td><strong>Environment/Land:</strong></td>
<td>Purchase of cartographer, environmental analyst, environmental engineer, geologist, hydrologist, land appraiser, land use planner, meteorologist, and naturalist services.</td>
</tr>
<tr>
<td><strong>Publishing:</strong></td>
<td>Agreements most commonly used by the University of Illinois Press in order to secure publishing rights to someone else’s written work. The University signs these agreements only when the university is the entity securing publishing rights.</td>
</tr>
<tr>
<td><strong>Author/Editor:</strong></td>
<td>One or more individuals provide original content or editing services, which fall outside the scope of professional &amp; artistic services.</td>
</tr>
<tr>
<td><strong>Journal:</strong></td>
<td>University provides content and/or management/oversight.</td>
</tr>
<tr>
<td><strong>Sales:</strong></td>
<td>Agreements with non-university system sales representatives, who receive a commission based on sales volume.</td>
</tr>
<tr>
<td><strong>Real Estate:</strong></td>
<td>Agreements related to the use, lease, or license of property. The property may be owned by the university system or by another party from whom the university system is leasing or licensing.</td>
</tr>
<tr>
<td><strong>Lease:</strong></td>
<td>The owner of real estate property allows use of the property for a specified period of time (term) for specific periodic payments (rent), and other terms and conditions.</td>
</tr>
<tr>
<td><strong>Easement:</strong></td>
<td>Grants the right to use real property of another for a specific purpose. The easement is itself a real property interest, but legal title to the underlying land is retained by the original owner for all other purposes.</td>
</tr>
<tr>
<td><strong>License:</strong></td>
<td>A private grant of right to use real property for a particular purpose, or to perform a specific act.</td>
</tr>
<tr>
<td><strong>Relocation:</strong></td>
<td>Agreements related to the relocation of university system employees.</td>
</tr>
<tr>
<td><strong>Relocation:</strong></td>
<td></td>
</tr>
<tr>
<td><strong>Revenue Generating Services (Non-Healthcare):</strong></td>
<td>Agreements related to services provided by the university system for an outside entity and for which payment is received by the university system. Does not include revenue generated by gifts, grants, or sponsorships.</td>
</tr>
<tr>
<td><strong>Archival Services:</strong></td>
<td>Archival services provided by university libraries to outside entities.</td>
</tr>
<tr>
<td><strong>Conference Services:</strong></td>
<td>Conference coordination or conference management services provided by the university system to outside entities.</td>
</tr>
<tr>
<td><strong>Consulting Services:</strong></td>
<td>Various types of consulting services provided by the university system to outside entities.</td>
</tr>
<tr>
<td><strong>Data Collection Services:</strong></td>
<td>Data collection services provided by the university system to an outside entity, resulting in the return of factual data for interpretation by the client and not related to any research project or activity.</td>
</tr>
<tr>
<td>Type</td>
<td>Subtype</td>
</tr>
<tr>
<td>-------------------------------------------</td>
<td>-------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Evaluation Services</td>
<td>Evaluation services provided by the university system to an outside entity when those services are not related to any research project or activity.</td>
</tr>
<tr>
<td>Geographical Information System Services</td>
<td>Geographical Information Systems (GIS) services provided by the university system to an outside entity. This could include the development, presentation, and/or collection of GIS data, tools, maps, etc.</td>
</tr>
<tr>
<td>Geological Services</td>
<td>Geological services provided by the university system to an outside entity.</td>
</tr>
<tr>
<td>IT Services</td>
<td>Information Technology (IT) services provided by the university system to an outside entity.</td>
</tr>
<tr>
<td>Laboratory Services (Excluding Research &amp; Technical Testing)</td>
<td>Laboratory services provided by the university system to an outside entity when those services are allowable under university policy and are not related to any research or technical testing project or activity.</td>
</tr>
<tr>
<td>Marketing/Media Services</td>
<td>Marketing and media services provided by the university system to an outside entity.</td>
</tr>
<tr>
<td>Other</td>
<td></td>
</tr>
<tr>
<td>Student Field Experience</td>
<td>Services provided by university system students to an outside entity, resulting in revenue paid to the university system when such activity is allowable under university policy. Not a student placement (see under: Affiliation Agreements).</td>
</tr>
<tr>
<td>Survey Creation/Development Services</td>
<td>Creation of surveys and development of survey tools by the university system for use by an outside entity and when no data collection, analysis, or other such services are provided.</td>
</tr>
<tr>
<td>Test Administration Services</td>
<td>Test administration and proctoring services provided by university system testing centers for an outside entity.</td>
</tr>
<tr>
<td>Translation Services</td>
<td>Translation services provided by the university system to an outside entity.</td>
</tr>
<tr>
<td>Software</td>
<td>Agreements related to software owned by an outside entity and being purchased, licensed, or otherwise used by the university system. (Agreements related to university-owned software, or other forms of intellectual property must be processed through the Office of Technology Management.)</td>
</tr>
<tr>
<td>License</td>
<td>Software licensed by the university system.</td>
</tr>
<tr>
<td>Maintenance</td>
<td>Purchase of maintenance for university system-owned or licensed software.</td>
</tr>
<tr>
<td>Trial/Loan Agreement</td>
<td>Loan or trial of software to the university system.</td>
</tr>
<tr>
<td>Type</td>

## Appendix C: Prodagio Role Descriptions

### University

<table>
<thead>
<tr>
<th>Role</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Requestor</td>
<td>User in a unit or college who initiates contracts and contract requests. This role is chart-org specific (e.g. 1_100_requestor, 2_100_requestor, 4_100_requestor). It primarily governs access and permissions and may have multiple users assigned to it.</td>
</tr>
<tr>
<td>Business Manager</td>
<td>User in a unit or college, who probably oversees and reviews contracts and contract requests initiated by requestors. They may also initiate some contracts and contract requests themselves, serve as a proxy for their direct supervisor, and/or cover for other staff in their unit when necessary. This role is chart-org specific (e.g. 1_100_business_manager, 2_100_business_manager, 4_100_business_manager).</td>
</tr>
<tr>
<td>Unit Head</td>
<td>Department head or higher. Some units do not have department heads; some small colleges do not have departments. When there are only college-level offices for administration, the associate dean or dean may be assigned to the unit head role. This role is chart-org specific (e.g. 1_100_unit_head, 2_100_unit_head, 4_100_unit_head). It is assigned to only one user per unit. Checklist tasks are typically assigned to the role, rather than to the user by name.</td>
</tr>
<tr>
<td>Dean/Director</td>
<td>Administrator authorized to approve contracts $25,000 and above for their unit or college. This role is chart-org specific (e.g. 1_100_dean_director, 2_100_dean_director, 4_100_dean_director). Checklist tasks are typically assigned to the role, rather than to the user by name.</td>
</tr>
<tr>
<td>VP/Chancellor/Vice Chancellor</td>
<td>Administrator authorized to approve contracts $150,000 and above for their university. This role is chart specific (e.g. 1_chancellor_vice_chancellor, 2_chancellor_vice_chancellor, 4_chancellor_vice_chancellor). It is assigned to only a few users per university. Checklist tasks are typically assigned to the to the appropriate user by name, rather than to the role</td>
</tr>
</tbody>
</table>
### System Office

<table>
<thead>
<tr>
<th>Role</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Requestor</td>
<td>User in a System Office unit who initiates contracts and contract requests. This role is chart-org specific (e.g. 9_100_requestor). It primarily governs access and may have multiple users assigned to it.</td>
</tr>
<tr>
<td>Business Manager</td>
<td>User in a unit or college, who probably oversees and reviews contracts and contract requests initiated by requestors. They may also initiate some contracts and contract requests themselves, serve as a proxy for their direct supervisor, and/or cover for other staff in their unit when necessary. This role is chart-org specific (e.g. 9_100_business_manager).</td>
</tr>
<tr>
<td>Director/Executive Director</td>
<td>Administrator authorized to approve contracts up to $149,999 for their System Office unit. This role is chart-org specific (e.g. 9_100_director_executive_director). It is assigned to only one or two users per unit. Checklist tasks are typically assigned to the role, rather than to the users by name.</td>
</tr>
<tr>
<td>AVP</td>
<td>Assistant vice president in the System Office. These administrators are authorized to approve contracts $150,000 and above for the System Office units reporting to them. This role is chart-org specific (i.e. 9_100_AVP). Checklist tasks are typically assigned to the role, rather than to the users by name.</td>
</tr>
</tbody>
</table>

### Purchasing Office

<table>
<thead>
<tr>
<th>Role</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Purchasing Reviewer</td>
<td>Supervisor in the purchasing division who receives contracts and contract requests submitted for purchasing review and assigns the contracts to a specific buyer. This role is chart specific (e.g. 1_purchasing_reviewer, 2_purchasing_reviewer, 4_purchasing_reviewer). It is assigned to only one or two users in each university purchasing division. Checklist tasks are assigned to the role, rather than to users by name.</td>
</tr>
<tr>
<td>Purchasing Buyer</td>
<td>Staff member who handles the development, review, negotiation, and routing of procurement contracts and contract requests. This role is chart specific (e.g. 1_purchasing_buyer, 2_purchasing_buyer, 4_purchasing_buyer). It primarily governs access and has multiple users assigned to it for each university. Purchasing Reviewers assign checklist tasks to users in this role by name.</td>
</tr>
<tr>
<td>Purchasing Director</td>
<td>Administrator in the purchasing division who is authorized to execute procurement contracts on behalf of the university comptroller. This role is chart specific (e.g. 1_purchasing_director, 2_purchasing_director, 4_purchasing_director). It is typically assigned to only one or two authorized individuals on each university. Checklist tasks are assigned to a user by name, rather than the role.</td>
</tr>
</tbody>
</table>
### UIC Only

<table>
<thead>
<tr>
<th>Role</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>OBDS Reviewer</td>
<td>User in the Office of Business Development Services who receives UIC revenue-generating contracts and contract requests submitted for review and assigns the contracts to a specific OBDS coordinator. This role is chart specific (e.g. 2_obds_reviewer). It is assigned to only one or two users in OBDS. Checklist tasks are assigned to the role, rather than to users by name.</td>
</tr>
<tr>
<td>OBDS Coordinator</td>
<td>User in the Office of Business Development Services who handles the development, review, negotiation, and routing of UIC revenue-generating contracts and contract requests. This role is chart specific (e.g. 2_obds_coordinator). It primarily governs access and has multiple users assigned to it. OBDS reviewers assign checklist tasks to users in this role by name.</td>
</tr>
<tr>
<td>OBDS Reviewer</td>
<td>User in the Office of Business Development Services who receives UIC revenue-generating contracts and contract requests submitted for review and assigns the contracts to a specific OBDS Coordinator. This role is chart specific (e.g. 2_obds_reviewer). It is assigned to only one or two users in OBDS. Checklist tasks are assigned to the role, rather than to users by name.</td>
