2005	\$ 29,956,714	\$ 1,652,817	5.84%
2004	\$ 28,303,897	\$ 2,996,859	11.84%
2003	\$ 25,307,038	n/a	n/a

Notes:

The HERD survey data reflects research only data and therefore will not reconcile to other sponsored project expenditure reporting that includes other sponsored project activities, federal financial aid, and other types of federal funding.

The National Center for Sciences and Engineering Statistics under the National Science Foundation is the organization which compiles the data from the various higher education institutions across the country and then publishes the results. Although the Office of Government Costing submits UIUC's HERD survey annually by January 31st after each fiscal year close, the official results of the HERD survey results are not available until November. Therefore, the **FY2019 HERD Survey** will not be available until November, 2020.
